- Website updates, documentation, multilingual coordination, copy editing.
- Working with marketing, design, and tech teams across multiple countries.

Languages

- English (Fluent).
- Dutch (Fluent).
- German (actively improving).

Introduction

End-to-end product designer driving outcomes across consumer-facing and multi-market digital products. I co-own product roadmaps, define priorities, and influence strategy through close collaboration with Product Owners and developers. I lead hands-on design executionfrom concepts, wireframes, high-fidelity UI, and prototypes to design QA during developmentwhile iterating based on metrics post-release to optimize engagement, retention, and conversion. Embedded in Agile teams, I shape design systems, elevate design standards, and ensure measurable impact at every stage of the product lifecycle.

Experience

Hestiva Platforms B.V.

Product Owner (Growth Product)

Feb 2025 – Present

- Established KPI frameworks and performance dashboards to monitor user acquisition, engagement, and regional growth.
- Defined and owned the product roadmap for KeyScout.com, a rental-alert platform, driving growth to 250+ active users within five months through feature prioritization.
- Led cross-functional planning across engineering, design, and marketing to support coordinated regional product launches.

LeadMind Agency

Senior UX/UI Designer | Acting Product Owner

Jul 2022 – Jan 2025

- Owned end-to-end delivery of multiple digital platforms, from concept to market launch, coordinating timelines, documentation, and stakeholder input.
- Translated stakeholder requirements into actionable sprint deliverables, ensuring timely launch execution.
- Created product roadmaps synchronized with marketing cycles and data-driven user insights.
- Designed performance dashboards and content systems used across 8+ client websites.
- Facilitated regular cross-departmental meetings to review milestones and optimize workflows.

Tanaruz Boats

UX Designer Freelance Consultant

Oct 2021 – Jun 2022

- Partnered with marine engineers to translate technical specifications into an interactive configurator UX for 3D-printed boats.
- Bridged design and engineering requirements to deliver a functional prototype that increased user comprehension and engagement.

Education

Communication and Multimedia Design

The Hague University of Applied Sciences Aug 2018 – Jul 2021

Bachelor's degree

Subsidiary subject: HCI Technologies

In-depth study: Research Toolbox
