LinkedIn profile

Profile

Previously a Senior UX/UI Designer, I've transitioned into a Product Owner role, now leading a digital platform that helps people find rental properties across the Benelux region. Building on a strong foundation in user-centered design, I now focus on product strategy, execution, and cross-functional collaboration. Though my role has evolved, the design work I've done continues to support and shape the product experience.

Experience

Product Owner - Hestiva.nl & KeyScout.com

February 2025 - Present

- Led the end-to-end development and launch of a web-based rental property notification tool, enabling users to set region-specific filters and receive real-time alerts via WhatsApp and email.
- Acquired 118 registered users in the first month through strategic product positioning, intuitive UX, and a lean go-to-market approach.
- Owned content and SEO strategy, driving organic traffic and laying the foundation for long-term user growth.

Senior UX/UI Designer - LeadMind Agency

February 2024 - January 2025

- Expanded team from 4 to 11 members, resulting in a 4x increase in productivity.
- Spearheaded 8 major projects in 2024, including a new application, real estate investment platform, and multiple website rebrandings.
- Facilitated collaborative design workshops with stakeholders and developers, ensuring cohesive user experiences and accessibility compliance.
- Emphasized accessibility in all design handoffs, ensuring inclusive user experiences.

UX/UI Designer - LeadMind Agency

July 2022 - January 2024

- Conducted user research, competitive analysis, and usability testing to refine digital products.
- Streamlined design processes using Figma, Notion, and Canva for wireframing, asset creation, and prototyping.
- Translated research insights into detailed user personas to guide ideation and craft tailored design solutions that meet user needs and expectations.
- Provided constructive feedback to developers, improving design implementation accuracy to 89%.
- Guided an international development team of 6 members, streamlining cross-functional collaboration and reducing project timelines by 10%.

UX/UI Designer (Freelancer) - Tanaruz

October 2021 - June 2022

- Designed an intuitive mobile configurator interface for a 3D-printed riverboat app, reducing user error rates by 40%.
- Developed high-fidelity wireframes and prototypes using Figma, enhancing user interactions and aesthetic appeal.
- Delivered final designs 2 weeks ahead of schedule, enabling extended testing and refinement phases.

Education

Bachelor of Communication and Media Design (CMD)

September 2018 - July 2021

The Hague University of Applied Sciences.
